

ESTIMATION · POWERED BY META-ETA™

An ETA for your ETA — delivered as a Meta-ETA™.

The M2 Fufffel ETA Estimating Service is built entirely around our flagship **Meta-ETA™**. We don't estimate the work — we estimate when we'll next be able to estimate it, and hand back an executive-ready, date-shaped object suitable for framing, minus the commitment.

CORE PROPOSITION

Meta-ETA™

Not when it's done. When we'll next be able to say when it's done. On time, every time — unlike the thing it estimates.

WHY META-ETA™

Confidence without the burden of a date.

For the gap between “when will it be done?” and “when will we know when it will be done?”

01 / META

Meta-ETA™ generation

The core deliverable: not the ETA, but the estimate of when the next estimate will be ready.

02 / CONF

Confidence in the confidence

We measure our confidence in the Meta-ETA™, then Meta-ETA™ that confidence too. Turtles, but scheduled.

03 / LOOP

Recursive re-forecasting

Each Meta-ETA™ politely schedules the next Meta-ETA™. The date always exists; its meaning stays out of scope.

04 / SHAPE

Date-shaped object

A deliverable that looks exactly like a date — suitable for slides, framing and steering groups — minus the commitment.

THE PROPRIETARY ESTIMATION ARCHITECTURE

The Meta-ETA™ Confidence Ladder

ETA → Meta-ETA™ →
Meta-ETA™²

Each rung more confident on the surface and less committal underneath.

Ask for an ETA and you climb the ladder: directional-ish, plausible pending alignment, estimated estimate, and finally a Meta-ETA™ — with a Meta-ETA™ for the Meta-ETA™ available on request.

EM-01 Estimate the estimate

We do not estimate the work. We estimate when we could estimate it, and call that progress.

META-ESTIMATION

EM-02 Calibrate the confidence

We rate our confidence in the Meta-ETA™, then rate our confidence in that rating. Executive-ready either way.

CONFIDENCE²

EM-03 Schedule the next Meta-ETA™

Deliver the date-shaped object and automatically book the Meta-ETA™ for the Meta-ETA™. The loop never closes; the calendar never empties.

RECURSIVE DELIVERY

Every rung is a Meta-ETA™.

Pick a level of certainty; we will phrase it as a date
without becoming one.

- Directional-ish
- Plausible pending alignment
- Estimated estimate
- Meta-ETA™ (you are here)
- Meta-ETA™ for the Meta-ETA™
- Probably after the next sync

"The Meta-ETA™ is on track. The thing it estimates remains a
mystery."

— M2 FUFFFEL ETA ESTIMATING SERVICE · META-ETA™ STATUS REPORT

Disclaimer. Fictional satire, not a real estimation method and not project, financial or delivery advice. A Meta-ETA™ is not a commitment, a plan, or a date you should act on. For real forecasting, use real data and real accountability.

Get your Meta-ETA™.

Every tier returns a Meta-ETA™, never an actual date.

01 · SINGLE

Single Meta-ETA™

One date-shaped object for one deliverable. Looks committal in a slide; isn't, in reality.

OUTPUT: a Meta-ETA™

02 · LADDER

Confidence Ladder Package

All six rungs, from directional-ish to after-the-next-sync, so stakeholders can choose their own certainty.

OUTPUT: Meta-ETA™ for the Meta-ETA™

03 · RETAINER

Meta-ETA™-as-a-Service

Continuous re-forecasting. Each Meta-ETA™ schedules the next, so a fresh date always exists on demand.

OUTPUT: perpetual forecast

ENGAGEMENT TRIGGER

You ask for an ETA. We deliver a Meta-ETA™
— and a Meta-ETA™ for the next one.

Book a 30-minute estimation session. You'll leave with a
confident, framable, entirely non-committal date-shaped object.

M&M FUFFFEL CONSULTING AB

Fictive company · Not a real offering · No deadlines were harmed, or met.
