

STRATEGY & GOVERNANCE • CAPACITY PLANNING • PLAUSIBLE CONTROL

Every requirement, from everyone, rendered gloriously ungraspable.

Grand Unified Pool Governance™ is the capacity-strategy capstone: we gather every dynamic-pool and static-pool requirement from every user across the whole company, then apply **Convincing Nonsense™**, Meta-ETA™ and the Dark Cloud Navigator™ to produce a strategy so comprehensive nobody can grasp it — but the slides make everyone feel deeply reassured.

CORE PROPOSITION

All in.
None grasped.
All reassured.

Dynamic pools, static pools, and the strategy in between — unified into one confident, incomprehensible whole.

WHY UNIFY, WHY NOW

Clarity is overrated. Reassurance scales.

For the gap between “users should come with requirements” and “what is our pool strategy, exactly?”

01 / INGEST

Total requirement ingestion

Dynamic pools, static pools, half-pools, hypothetical pools — every requirement from every user, collected and never refused.

02 / FOG

Strategy fog synthesis

Convincing Nonsense™ + Meta-ETA™ + Dark Cloud Navigator™ blend it into one weather-shaped strategy no single human can hold in their head.

03 / GOVERN

Governance theatre

Steering groups, RACI charts and decision gates that look rigorous and commit to nothing in particular.

04 / REASSURE

Reassurance-grade slides

The output nobody understands, presented so confidently the room applauds and asks no follow-up questions.

The Grand Unified Pool Model™

all requirements ÷ graspability

Everyone's needs in; one confident, incomprehensible strategy out.

Every dynamic and static pool requirement across the company converges into a single strategy so total that no individual can summarise it — which is precisely what makes it feel authoritative.

GU-01

Gather everything

Collect every pool requirement from every user, everywhere. Say yes to all of them. Reconcile none of them.

TOTAL INTAKE

GU-02

Apply the fog

Run it through Convincing Nonsense™, forecast it with Meta-ETA™, and navigate it with Dark Cloud Navigator™.

STRATEGIC HAZE

GU-03

Present, reassuringly

Compress the ungraspable whole into slides so confident the steering group feels in complete control of something they cannot describe.

GOVERNANCE THEATRE

POWERED BY

The reassurance stack.

The services we blend into one ungraspable governance layer.

- Convincing Nonsense™
- Meta-ETA™
- Dark Cloud Navigator™
- OSG Slide Generating Service
- M² Decision Model
- Union Alignment Nonsense Engine™

"I don't understand our pool strategy at all now, and I have never felt more confident about it."

— GRAND UNIFIED POOL GOVERNANCE™ · REASSURED STEERING GROUP

Disclaimer. Fictional satire — not real capacity planning, strategy or governance advice. Real pool strategy needs clear requirements and decisions people can actually understand, not Convincing Nonsense™.

Unify your pools. Reassure your org.

Every tier ends with a deck nobody can question and everybody applauds.

01 • INTAKE

Requirement Round-Up

We collect every dynamic- and static-pool requirement from every user. No prioritisation, no refusals, no judgement.

OUTPUT: an infinite backlog

02 • UNIFY

Grand Unified Pool Model™

The full blend — Convincing Nonsense™, Meta-ETA™ and Dark Cloud Navigator™ — into one ungraspable strategy.

OUTPUT: a strategy-shaped fog

03 • RETAINER

Governance-as-a-Service

Standing steering groups, refreshed reassurance decks, and perpetual strategy that never resolves and never alarms.

OUTPUT: eternal reassurance

ENGAGEMENT TRIGGER

You bring every requirement. We bring the fog, the slides and the standing ovation.

Book a 30-minute governance session — you'll leave reassured, aligned, and entirely unable to explain why.

M&M FUFFFEL CONSULTING AB

Fictive company · Not a real offering · No strategy was actually understood.
