FICTIVE SINCE 2026 · RECURSIVELY READY TO
CONNECT

CONNECTION-AS-A-SERVICE · ALIGNMENT AMBIENCE · RECURSIVE FOLLOW-UP

We put people together to talk.

The convenient alternative to real work: we introduce the people who really should meet, so they can meet, so they can decide to **meet again** — **with more people**. Every conversation produces slides, the slides produce follow-up syncs, and the syncs produce the need for even more networking. Momentum without motion, powered by **Convincing Nonsense™** and served with a warm mug.

CORE PROPOSITION

"Great
catchup —
let's
catchup."

Each meeting schedules the meeting that schedules the next meeting. The graph only grows; nobody is ever left un-networked.

WHY NETWORK, WHY NOW

Recursive by design.

For the gap between “we should really do the work” and “let’s get the right people in a room first.”

01 / CONNECT

Curated introductions

We connect the people who really should talk — chosen for reach, never relevance — then step back and let the alignment ambience build itself.

02 / CAPTURE

Slide-generating conversations

Every coffee produces a takeaway, every takeaway a slide, every slide a reason to reconvene the group that produced it.

03 / RECURSE

Recursive follow-up engine

The output of each networking meeting is another networking meeting. The graph only grows; the backlog of introductions is never fully resolved.

04 / EXPAND

Second-degree onboarding

Everyone you meet knows three people you simply must meet. We onboard them too. Reach compounds; outcomes stay pleasantly out of scope.

The Networking Recursion™

network(you) →
network(everyone they know)

network(you) = coffee × people × slides ÷ outcomes. The base case is never reached; the calendar simply fills.

Each engagement calls itself on a wider set of contacts.

There is no termination condition — only a recurring invite, a fresh deck and a warmer mug.

RN-01 Identify who should meet

We map the people who would benefit from “just connecting” — a set defined by seniority, adjacency and vibes, not by any pending decision.

REACH OVER RELEVANCE

RN-02 Convene and capture

Coffee is poured, rapport is built, and a slide is quietly born. The meeting concludes with warm energy and one clear takeaway: another meeting.

SLIDES AS OUTPUT

RN-03 Recurse into the network

Each attendee nominates the people they simply must introduce you to. We schedule those too. Repeat until the quarter, not the problem, is resolved.

NO BASE CASE

Everything except a decision.

Warm, well-attended, and reliably self-perpetuating.

- a follow-up sync
- three new intros
- one confident slide
- "let's take this offline"
- a recurring invite
- an action item to schedule
- a warm mug
- a workshop to align on it

"We networked about the networking. Then we scheduled a workshop to align on the follow-up sync."

— RECURSIVE NETWORKING™ · SELF-REFERENTIAL RETROSPECTIVE

Disclaimer. Fictional satire — not real networking, career or business-development advice. Genuine relationships are built by actually helping people, not by recursively scheduling coffee.

Connect responsibly. Recursively.

Every tier includes coffee, a slide and a follow-up you did not quite ask for.

01 · INTRO

Single Connect

One curated introduction over coffee, one shared takeaway, and one perfectly reasonable reason to reconvene.

OUTPUT: a follow-up sync

02 · RECURSION

The Networking Recursion™

Each meeting spawns the next across a widening set of contacts, complete with decks, until the calendar — not the problem — is full.

OUTPUT: more meetings

03 · RETAINER

Networking-as-a-Service

Continuous connection: a standing programme of intros, catchups and workshops so no relationship is ever left un-networked.

OUTPUT: perpetual networking

ENGAGEMENT TRIGGER

You bring the ambiguity. We bring the coffee, the contacts and the recurring invite.

Book a 30-minute connect — and leave with three intros, one slide and a follow-up sync about the follow-up.
